

Lifestyle Collection Furniture

INSTALLATION GUIDE

Before discarding the packing materials - ensure all the parts are accounted for.

See reverse side for additional steps and Lifestyle Collection Furniture overview.

PARTS LIST			
Legs (2) & Washers (2)	Wings (2)	Headboard	
			
Side Rails (2)		Footboard	
			
Remote (2)	Leather Cover (2)	Optional Parts (Not Included)	
		Side Table	Support Bar
			

STEP 2

Plug the power cord extending from the back of the headboard into a power source. A surge protector is recommended.

STEP 3

Plug the base and any additional products (example: Dual Temp, Warming Layer) into the control panel on the front of the headboard.

STEP 4

Place the right and left side rails alongside each side of the bed.

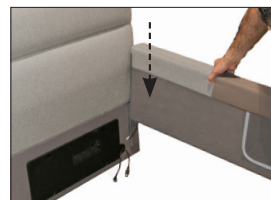

STEP 5

Locate the wires with a square plug (coming from the headboard and side rail). Connect these wires. There is one on each side of the bed.

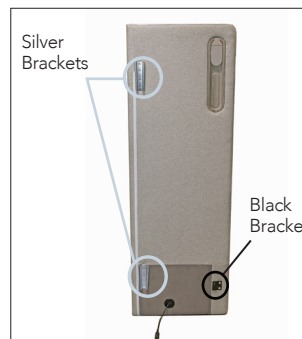

STEP 6

Connect the headboard with the side rails.

STEP 7

Attach the wings to the headboard. There are two silver brackets and one black bracket. Align the silver brackets of the wing to the silver brackets on the sides of the headboard and slide the wing down and into place.

Important for Unboxing:

- You must open the headboard and reposition the wires before setup. Open the headboard box from the bottom, in a way that you can access the bottom of the headboard. See pictures below:

- There are wires located on left and right side of the headboard. The wires are twist tied to the bottom. Remove the wires from the twist tie, and push them into the black grommet so no wires are showing. Repeat on other side.
- Once the wires have been repositioned, cover the headboard with the plastic bag for protection while handling. Proceed to step 1.

STEP 1

Place the headboard into the final position in the room based on customer preference.

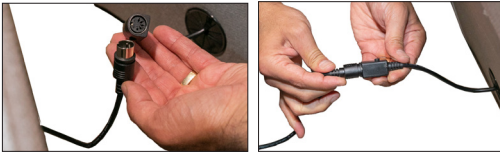

NOTE: When installing, the silver brackets will align first. Press against the side of the wing with your body weight as you slide the wing down and into place. This will ensure the black brackets at the bottom make contact and connect.

Ensure both wings are pushed all the way down and flush to the top of the headboard.

STEP 8

Locate the wires with a round plug (coming from the headboard and headboard wing). Connect these wires. There is one on each side of the bed.

STEP 9

The remotes need to charge before they can be paired. Ensure the red switch on the control panel of the headboard is powered "On". Dock both remotes and let them charge for 3-5 minutes before pairing.

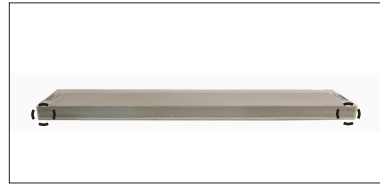

- Remove both remotes from their charging dock. You will need to have the remote in hand before you enter pairing mode.
- Pairing Mode - Turn the red switch off, wait 3 seconds and turn it back on. **You now have 10 seconds to pair the remote to the bed.**
- Press any button to wake the remote (buttons will light up).
- Press and hold the POWER button until the backlights start flashing rapidly, then release the button.
NOTE: Pairing is successful if the flashing stops completely. If the lights flash slowly, pairing was not successful. Repeat Steps A-D.
- You can confirm the remote is paired by checking to see if the SYNC light is illuminated. You can also confirm the remote is paired by pressing POWER button to control the Sleep/Wake light on the back of the headboard.
- Pair the other remote by following Steps B-E.

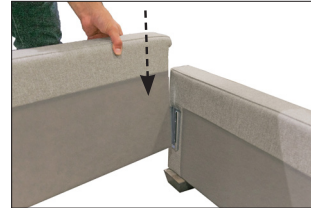

STEP 10

- Place washers then install the legs on footboard and tighten by hand.

- Push bed and base back against headboard. Connect the side rails with footboard.

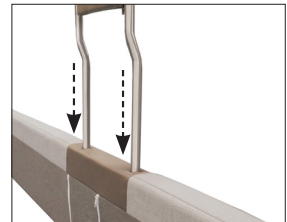

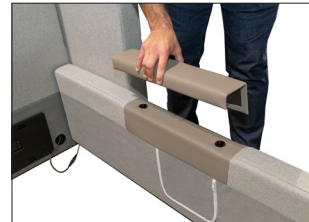

Check to ensure the remotes, bluetooth speakers, sleep/wake lighting, reading light, and USB/wireless chargers are connected and functional. Reference the User Guide for additional information.

(Optional - Support Bar & Side Table Sold Separately)

Installation of support bar and side tables

- For side table accessory, assembly is required. Refer to instructions located inside the side table packaging.
- Remove the leather cover and give to customer to keep for themselves.
- Install support bar and side tables by inserting the ends into the holes with the table top facing away from the bed.
