

SLEEP NUMBER 360® SMART BED  
MAGNET INSTALLATION GUIDE

# Getting Started

## WHAT YOU'LL NEED

- Two people to lift the mattress and base
- Time to complete: about 10 minutes

## BEFORE YOU START

- Read through the **Sleep Number 360° Smart Bed and FlexFit™ Adjustable Base Assembly Guide** to make sure you understand all the steps.
- Mattress and adjustable base must be fully assembled before attaching magnets per the instructions in this installation guide.
- Make note of the exact type of base you purchased. You can find this on your receipt or online order history. (Example: FlexTop® King).

### **WARNING – STRONG MAGNETS**

- Remove magnets from the shipping box and leave them in their cardboard packaging until it's time to install them per the following instructions.
- Magnets are extremely strong. Unpackage only one magnet at a time. Do not unpackage the next magnet until you've secured the previous magnet during assembly.
- Before and during assembly, maintain a minimum of 6 inches between any medical device such as a pacemaker or medical implant and the magnets. When the mattress is fully assembled and attached to the FlexFit™ smart adjustable base, the magnetic field is less than 5 Gauss at any distance and is generally considered safe.
- Keep tools and other metal objects away. To avoid damage, keep magnetic media such as computer disks and credit cards away.
- Failure to follow this warning could result in pinched fingers or serious injury.

**IMPORTANT:** To avoid injury, read all safety precautions and follow the instructions on the safe use of all the features. Keep this guide for future reference.

# Attaching Magnets to the Mattress

The same number of magnets are included for all King and Queen mattresses, therefore, you may have extra unused magnets after completing assembly.

If you have more magnets than needed for your mattress size, please attach them to the inside of the base frame near the head of the bed.

Two different color magnets are included: black and silver. You'll use them to attach the mattress to the adjustable base. Once you've attached the magnets to the mattress, they'll connect to a mounting plate of the same color on the base.

**black magnet  
(underside)**

**silver magnet  
(underside)**

**black  
mounting plate**

**silver  
mounting plate**

Before attaching the magnets, identify the bed size you have.

Using two people, carefully turn the mattress upside down next to the base, with the bed label toward the foot of the base. You'll see the magnet mounting plates on the underside of the mattress.

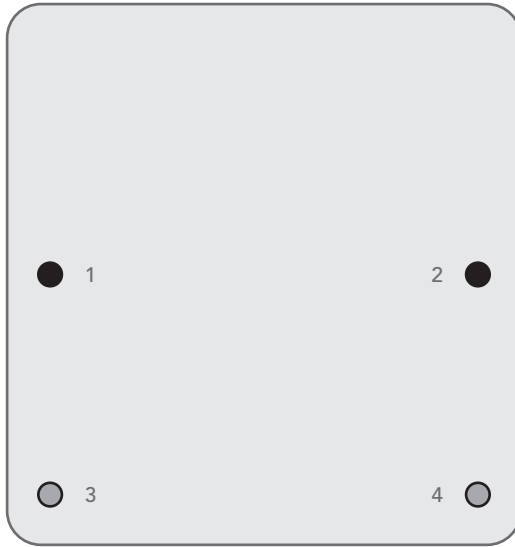

Follow the instructions for magnet placement for your size mattress on the following pages. Attach magnets to the mounting plates on the underside of the mattress at points indicated with black and silver circles in the following diagrams. Be sure to match the magnet color to the same color mounting plate (black to black, silver to silver).

Once all magnets are attached to the underside of the mattress, carefully turn the mattress over and align the magnets to the connecting points on the adjustable base indicated in the following images.

# Standard King or California King

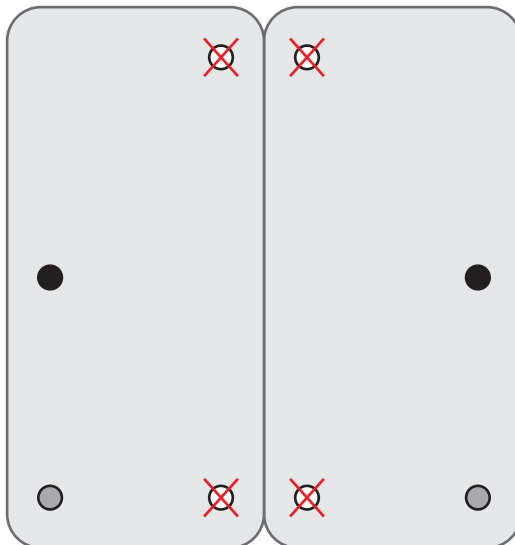

**SCREW IN 4 MAGNETS (2 BLACK, 2 SILVER) TO MOUNTING PLATES ON UNDERSIDE OF MATTRESS**

(head of bed)

**THEY WILL ATTACH TO THE BASE AT THE POINTS INDICATED BELOW**

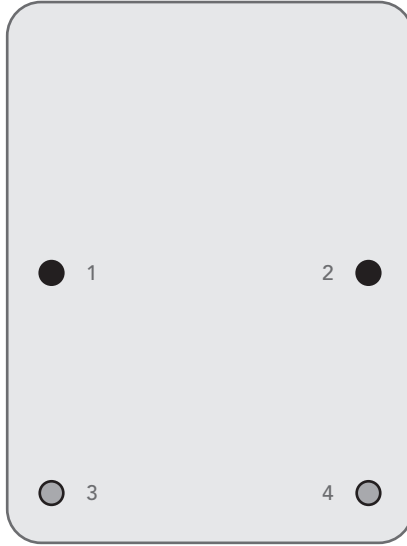

(head of bed)

# Standard Queen

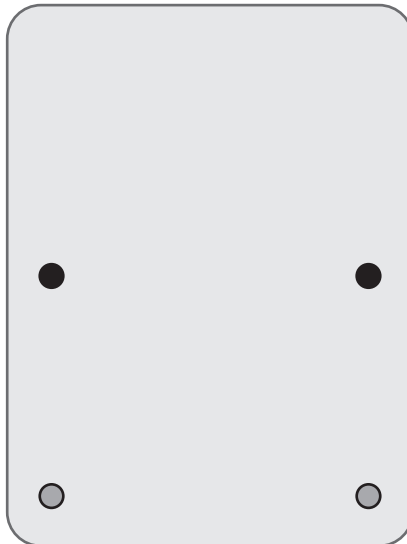

**SCREW IN 4 MAGNETS (2 BLACK, 2 SILVER) TO MOUNTING PLATES ON UNDERSIDE OF MATTRESS**

(head of bed)

**THEY WILL ATTACH TO THE BASE AT THE POINTS INDICATED BELOW**

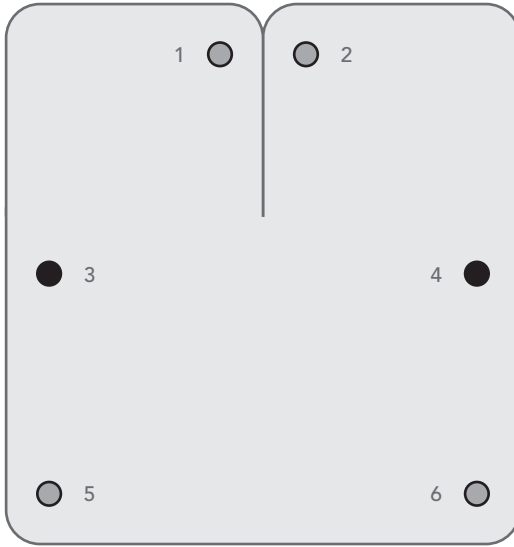

(head of bed)

# FlexTop® King

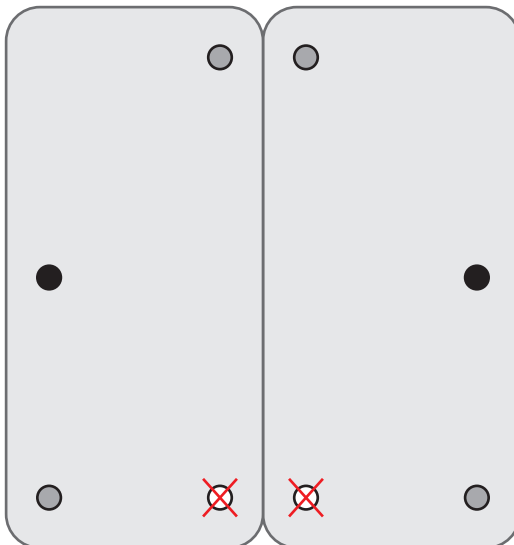

**SCREW IN 6 MAGNETS (2 BLACK, 4 SILVER) TO MOUNTING PLATES ON UNDERSIDE OF MATTRESS**

(head of bed)

**THEY WILL ATTACH TO THE BASE AT THE POINTS INDICATED BELOW**

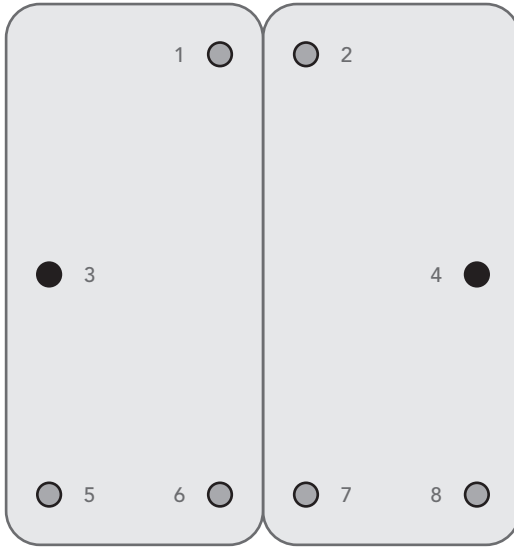

(head of bed)

# Split King

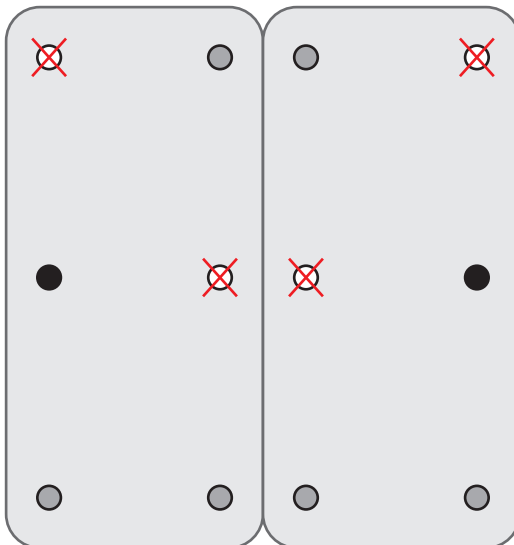

**SCREW IN 8 MAGNETS (2 BLACK, 6 SILVER) TO MOUNTING PLATES ON UNDERSIDE OF MATTRESS**

(head of bed)

**THEY WILL ATTACH TO THE BASE AT THE POINTS INDICATED BELOW**

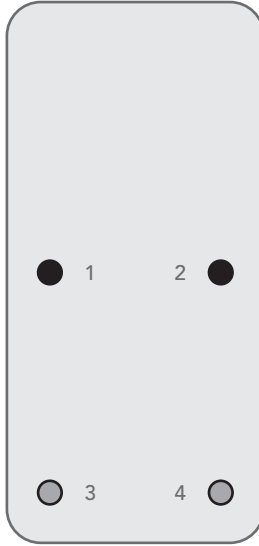

(head of bed)

# Twin Extra-Long

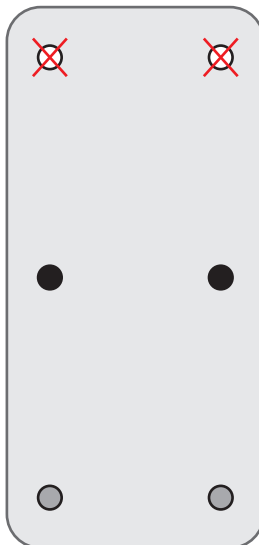

**SCREW IN 4 MAGNETS (2 BLACK, 2 SILVER) TO MOUNTING PLATES ON UNDERSIDE OF MATTRESS**

(head of bed)

**THEY WILL ATTACH TO THE BASE AT THE POINTS INDICATED BELOW**

(head of bed)
